FIGHTING AGAINST CHILD ABUSE ADANA, SOUTH TURKEY

Join with Bradley Interact Club to help raise funds to provide a colposcope for forensic evidence to convict a child abuser.

Over the past 15 years there has been a standardization in the use of the colposcope for photo documentation in the evaluation of child sexual abuse cases. The use of colposcopy has become the standard of care for pre-adolescent children, adolescent and adult sexual assault victims.

Without clear photographic documentation, there is a 50 percent chance that person who has done the abuse can be cleared and unfortunately can continue to abuse the child.

With our help, we can help these abused children and adults.
Cost of one colposcope: \$2,000

2014 - 2015
